Traditional accounting systems rely mostly on cost drivers originated from direct costs (materials and labor) to allocate overhead, and a two-stage process is used. First, overhead is reported to cost centers. Second, the overhead is distributed from the cost centers to the actual products, depending on the amount of cost driver consumed by each product in a specific cost center. This way of ...

RADIUS is an open-standard AAA protocol using UDP port 1645 or 1812 for authentication and UDP port 1646 or 1813 for accounting. It combines authentication and authorization into one process; thus, a password is encrypted for transmission while the rest of the packet will be sent in plain text. RADIUS offers the expedited service and more comprehensive accounting desired by remote-access ...
